

1. Find out the tweet with most retweets.

We use the **collOriginal** collection obtained from the previous query to directly get the results for this query.

```
db.collOriginal.find().sort({ret_count:-1}).limit(1)
```

```
> db.collOriginal.find().sort({ret_count:-1}).limit(1)
{ "_id" : ObjectId("58f67be056d5f53a50ba8374"), "id" : NumberLong("843225229648433152"), "orig_id" : NumberLong("823624278230695936"), "ret_count" : NumberLong(36702), "favorite_count" : NumberLong(41181), "created_at" : "Sat Mar 18 22:18:55 +0000 2017" }
